

## What are the benefits of RPW?

Short treatment time (minutes)

Treat large areas

Non-invasive and no known significant adverse effects

Muscle massage with vibrating applicator

Results in a few treatments

Alternative to medication

## What areas can RPW treat?

[djoglobal.com/RPW](https://djoglobal.com/RPW)

Each patient testimonial relates an account of an individual's response to treatment. However, these responses do not provide any indication, guide, warranty or guarantee as to the response other people may have to the treatment. Responses to the treatment can and do vary; not every response is the same.

# A HELPING HAND FOR YOUR RECOVERY

## Radial Pressure Wave (RPW) Therapy

## What is Radial Pressure Wave Therapy?

Radial Pressure Waves (RPW) are acoustic waves that generate oscillations in the tissue. Radial pressure wave therapy helps reduce muscle pain and activate connective tissue, temporarily aid in the increase of blood flow, and help in the treatment of tendinitis in hips and shoulders<sup>1,5</sup> and helps to improve pain in various musculoskeletal conditions.<sup>2,3,4,5,6,7</sup>

## What does RPW feel like?

Patients may report feeling soreness and a thumping sensation when the treatment head passes over dysfunctional tissues. Patients report feeling very little discomfort when it actively travels over healthy tissue. The level of discomfort depends on the area being treated, the settings on the device, and the acuity of the condition. Minor post-treatment soreness around the involved area is not uncommon.

## How long do treatments last?

About 10 minutes.

## How many treatments will I need?

Generally 4-6 treatments, potentially 8.

## What do patients say?

"How is this even possible after only one treatment, I cant believe how good I feel and how much motion I have. I have been in therapy for months, had injections, been on medication for pain and now I feel great with one treatment of this machine. Why doesn't everyone have this in the clinic?"

Diane  
Cervical spine degeneration

"I canceled the MRI and the surgical consult and my pain level is almost non existent, this thing has been amazing. I am 90% back to work already."

Joe  
Low back injury
